

Visit Us this Spring

Our enrichment activities are in full bloom this Spring.

World at Their Fingertips

Our everyday learning program, *The World at Their Fingertips*, creates developmental, cultural, and individually appropriate learning environments that empower children to become confident, successful, lifelong learners.

Spring 2010 Activities

YOUNG EXPLORERS - Infants

Sensory activities, songs, stories, finger plays and art projects about “Birds, Buds and Butterflies” will provide opportunities to explore the texture, color and sounds of spring.

NEW ADVENTURE - Toddlers

Toddlers will practice fine motor skills and express their creativity by creating tissue paper flower gardens. Math concepts of “more and less” and “empty or full” will be discovered while playing with water in the sensory table. During story times themes of spring and new life will be explored through books, songs and finger play.

EARLY LEARNERS - Preschoolers

The preschoolers will be hungry for spring after reading *The Very Hungry Caterpillar* by Eric Carle. They will have a splashing great time exploring color with raindrop art and science projects. Come visit the flower shop in our dramatic play area.

DISCOVERY ZONE – School Aged

We'll be buzzing with activity this Spring Break! The school aged will study the science behind rainclouds, evaporation and how rainbows are created. They will also practice their green thumb skills by helping plant spring flowers for the classroom.
