- What in the World?:** Juice Pops
- What do you need?:** Juice, popsicle sticks, ice tray, small plastic pitcher or measuring cup with a pouring spout.
- What you do:** Make or buy ready-made juice. Children pour the juice into the ice trays and put them in the freezer. When the juice begins to harden, put a popsicle stick in each cube.
- Tips:** With all kitchen activities, it's helpful to make preparation and cleaning up part of every project.
- Value:** Science Rocks — Observing the changing properties of liquid when it is frozen.
Motor — Hand-eye coordination, pouring.
- Variations:** Mix different juices. Let your child choose the juice.

We did it!
